

JYOTHI BOYINA

Senior Data Analyst | Analytics Engineering | Data Governance | Business Intelligence

Dallas–Fort Worth Metroplex, TX 214-604-9581 | Jyothib8@gmail.com | [LinkedIn: https://www.linkedin.com/in/jyothi-boyina-ab1508256/](https://www.linkedin.com/in/jyothi-boyina-ab1508256/)

PROFESSIONAL SUMMARY

Results-driven Senior Data Analyst and Analytics Engineer with 11+ years of enterprise experience delivering scalable data quality frameworks, BI solutions, and governance programs across banking, insurance, and telecom. At Citigroup, engineered AI-powered automation that eliminated ~95% of manual data quality implementation effort across 1,000+ enterprise rules. Expert in SQL performance optimization, dimensional modeling, Power BI (DAX), cloud-based ETL (Azure Data Factory, Databricks), and data governance platforms (Collibra, Starburst). Proven ability to translate complex data into executive-level insights that drive measurable business outcomes. Pursuing advancement in analytics engineering and data platform roles.

CORE COMPETENCIES & TECHNICAL SKILLS

Analytics & BI	Power BI (DAX, Power Query, Direct Query), Tableau, Looker, Looker Studio, Excel
SQL & Databases	SQL Server, Oracle, DB2, MongoDB, Hive, Spark, T-SQL, PL/SQL, query optimization, indexing
Data Engineering	Azure Data Factory, Azure Databricks, SSIS, Informatica Cloud, Denodo, ETL/ELT pipelines
Governance & DQ	Collibra (CDE registration, metadata), Starburst, Citi Hawk, Open Refine, Melissa
Programming	Python (pandas, data wrangling), SQL, DAX, Java, C/C++
Cloud & DevOps	Azure (ADF, Databricks, AI-900), Agile/Scrum, Jira, Confluence, Visual Studio
AI / Automation	AI agent workflows, LLM-assisted data quality automation, Databricks Agentic AI

PROFESSIONAL EXPERIENCE

Assistant Vice President — Sr. Data Analyst | Citigroup (via Procom Services) Jan 2023 – Present
Irving, TX

- Engineered and maintained 1,000+ enterprise data quality (DQ) rules across UAT, Staging, and Production environments, achieving 99%+ rule coverage for critical regulatory datasets.
- Designed and implemented 500+ new DQ controls spanning completeness, validity, conformity, consistency, and timeliness — reducing downstream data incidents by an estimated 40%.
- Architected AI agent-powered automation pipeline for DQ rule implementation, cutting manual effort by ~95% and enabling the team to scale governance operations without headcount growth.
- Led end-to-end Collibra governance workflows including Critical Data Element (CDE) registration, business glossary curation, and metadata remediation, improving data discoverability across 15+ business domains.
- Built executive Power BI dashboards with drill-through KPI scorecards and DAX-calculated measures, enabling C-suite visibility into data quality posture and regulatory compliance status.
- Managed Jira release workflows, JQL reporting, deployment evidence tracking, and production sign-off activities supporting quarterly release cycles across 8+ data domains.

Technologies: SQL, Oracle, Hive, Spark, Starburst, Collibra, MongoDB, Python, Power BI, DAX, Azure Databricks, Jira

SQL Server & Power BI Developer | KeyBank

Mar 2020 – Jan 2023

Houston, TX

- Architected an enterprise data warehouse (EDW) supporting loan amortization analytics for a \$50B+ portfolio, reducing monthly reporting cycle time by 35%.
- Designed star and snowflake dimensional models with optimized fact and dimension tables, improving query performance by up to 60% for high-frequency reporting workloads.

- Built 20+ interactive Power BI dashboards with KPI metrics, scheduled refreshes, row-level security (RLS), and workspace governance — serving 200+ business users across lending and finance.
- Developed reusable DAX measures, optimized semantic models, and implemented incremental refresh policies, reducing dashboard load times by 45%.
- Implemented stored procedures, functions, indexes, and optimized joins, reducing average query execution time by 50% across critical reporting pipelines.

Technologies: SQL Server, T-SQL, Power BI, DAX, Oracle, Power Query, SSMS, SSIS

SQL Server & Power BI Developer | **Verizon**

Aug 2018 – Mar 2020

Irving, TX

- Designed and developed end-to-end ETL pipelines using SSIS to move and transform 10M+ daily records from 6 source systems into a centralized enterprise reporting warehouse.
- Built SSIS workflows, T-SQL stored procedures, and complex transformation logic supporting network performance and customer analytics for 100M+ subscriber base.
- Delivered 15+ Power BI dashboards with Power Query transformations, DAX metrics, and direct query connectivity, enabling real-time operational monitoring.
- Automated data validation and reconciliation processes, reducing manual QA effort by 30% and improving data accuracy SLAs.

Technologies: SQL Server, SSIS, Power BI, DAX, T-SQL, ETL, Power Query

SQL Server & Power BI Developer | **MetLife**

Sep 2016 – Jul 2018

Allen, TX

- Developed ETL processes integrating data from Oracle, DB2, SQL Server, XML, Excel, and flat files into a unified insurance data warehouse.
- Built logical and physical data models aligned with actuarial and claims business requirements, supporting premium analytics and risk reporting.
- Created Power BI datasets, dashboards, and drill-through reports adopted by 100+ analysts across claims, underwriting, and compliance teams.
- Wrote complex SQL queries, stored procedures, and PL/SQL functions reducing report generation time by 40%.

Technologies: Power BI, SQL Server, Oracle, DB2, PL/SQL, ETL, SSIS

.NET & Java Developer | **TRISAS Solutions**

Mar 2006 – Jul 2008

Hyderabad, India

- Developed and integrated application modules using .NET and Java technologies; built SQL Server and DB2 backend logic including stored procedures, triggers, and API integrations.

Technologies: .NET, Java, SQL Server, DB2

CERTIFICATIONS

- Microsoft Azure AI Fundamentals (AI-900)
- Databricks Agentic AI Fundamentals (2026)
- Databricks Fundamentals — Databricks Academy
- Microsoft Power BI Data Analyst Certification
- Microsoft SQL Server Certification
- Google AI Essentials (2024)

EDUCATION

Master of Computer Applications (MCA) | Jawaharlal Nehru Technological University 2004
